(Cent OS 7)

Tomislav Vukelić

FULL-STACK DEVELOPER

I am a 28-year-old developer with over a decade of programming experience in C#, JavaScript (Node.JS) and PHP. My passion is writing high quality code with a focus on security and scalability.

EXPERIENCE

OWNER ORIGO-KOD – PROGRAMMING CRAFT
Dec 2022 - Present

Started a craft with the aim of providing development services for custom software per user specifications which include analysis of business requirements, database design and implementation and implementation of design templates and more.

Technologies: PHP, Node.JS, SQL

FULL-STACK DEVELOPER PAC LTD.
Jul 2018 - Present

Development of software for higher education organisations
One of the developers of the administrative and user frontends and backends + microservices, addressed client issues, analyzed feature requests and their means of implementation, and assisted with database related development (wrote MS SQL Stored procedures)

Technologies: HTML / CSS / JavaScript / jQuery / Node.JS / MSSQL

OTHER EXPERIENCES:

ASP.NET MVC (Web), WPF/Console (Desktop), Bulletin board system (PHP), Apartment booking platform (PHP), Custom PHP framework, Node.JS Web applications and dozens of passion projects in all the above. In addition to that, I have managed and configured CentOS 7 servers for web hosting and other services.
